Justin Ramos

IT GENERALIST | User Support | SaaS Administration | Security | Onboarding

jramos025@gmail.com
415-988-1225

SUMMARY

IT generalist with five years as the hands-on owner of IT at Bay East Association of REALTORS®, one of the largest REALTOR associations in the Bay Area. First-line support for a mixed Windows and Mac fleet, identity management in Okta and Azure AD, Google Workspace and Microsoft 365, license and asset tracking, and security-first operations. Built the custom ticketing system and the new hire onboarding process, wrote the organization's AI use policy, and am familiar with SOC 2 and GDPR expectations for access controls, audit trails, and data security. I explain technology in plain language and document what I build.

CORE SKILLS

IDENTITY AND SAAS	Okta, Azure AD (Entra ID), Google Workspace, Microsoft 365, Adobe Creative Cloud, Slack, Zoom, 1Password, license management
DEVICES AND ENDPOINTS	macOS and Windows, Intune, NinjaOne, Datto, hardware setup, asset inventory, backups
SECURITY AND COMPLIANCE	CrowdStrike, Windows Defender, KnowBe4 security awareness training, access controls, SOC 2 and GDPR familiarity, AI use policy
SUPPORT AND DOCUMENTATION	First-line support, ticketing, onboarding and offboarding, staff training, Jira, Confluence, policies and procedures
NETWORK AND INFRASTRUCTURE	Cisco, Meraki, Ruckus, TP-Link, redundant dedicated connectivity, VPN and VLANs, RingCentral VoIP, conference room AV (Nureva)
SYSTEMS AND AUTOMATION	Sage Intacct, iMIS on SQL, API and webhook integrations, Python, Node.js, JavaScript, SQL, WordPress, GitHub

PROFESSIONAL EXPERIENCE

IT Administrator

July 2021 to Present

Bay East Association of REALTORS®

USER SUPPORT, ONBOARDING, AND TRAINING

- First-line support for staff on both macOS and Windows, backed by a custom ticketing system embedded in the tools staff already use, so support work stays tracked with low friction.
- Built the new hire onboarding process and configured laptops with no local accounts, so every sign-in uses an organizational identity for centralized access control and clean offboarding.
- Deliver technology training and talks for both staff and real estate professionals.
- Write IT policy and procedures, and document projects in Confluence and Jira.

IDENTITY, SAAS, AND LICENSING

- Streamlined the Microsoft cloud environment, including Azure AD and Okta, for centralized identity and access control.
- Administer Microsoft 365 and the Adobe Creative Cloud account, support Google Workspace, Slack, and Zoom for team and vendor communication, and manage IT assets and licensing.
- Lead the organization's WordPress websites, including development, plugins, domains, and SMTP servers.

DEVICES, SECURITY, AND COMPLIANCE

- Support a mixed fleet of about 75% Windows and 25% macOS devices, managed through Intune, with NinjaOne for monitoring, patching, and remote support on both platforms.
- Maintain the IT asset inventory, lead hardware upgrades, and redesigned backups for our scale: Intune defaults user data to OneDrive and Datto backs up Microsoft 365, replacing Carbonite endpoint backups.
- Migrated from Datto RMM to NinjaOne, layered CrowdStrike with Windows Defender, and implemented and manage KnowBe4 for ongoing staff cybersecurity education.
- Authored the organization's AI use policy, covering an approved-tools list, data classification rules, vendor security review, new tool and integration approval, incident reporting, and record retention.
- Familiar with SOC 2 and GDPR requirements for access controls, audit trails, and data security.

SYSTEMS, NETWORK, AND AUTOMATION

- Led the migration from a homegrown SQL-based system to iMIS, including data migration, planning, implementation, and staff training, and now administer it with full responsibility for user access, reporting, and data quality.
- Technical lead on the Sage Intacct implementation team, covering integration, configuration, and staff education.
- Built API and webhook integrations that move data to vendors and third parties at the state and national level and replaced manual processes.
- Manage dedicated IPs for primary and backup connectivity, Cisco and Meraki networking, Ruckus access points, TP-Link gear, the RingCentral VoIP system, and conference room AV, including Nureva microphones.
- Designed and built Ursa AI, an internal AI platform, using AI-assisted development and now run it in production as sole builder and administrator, plus a public-facing chatbot with live staff handoff and a custom single sign-on plugin for the member portal.

Independent IT Consultant

November 2020 to Present

Medical Group, Philippines | Part-time, ongoing | Annual retainer

- Trusted technology advisor to the board of directors on technology and innovation strategy, including standard device selection, Microsoft 365 and SharePoint setup, paperless application and receipt processes, and network security (firewalls, VPN, VLANs, per-department subnets).
- Created Zoom and Teams training videos, deliver monthly department training as needed, and guide two on-site entry-level IT staff.

Golden Gate National Parks Conservancy

Social Science Technician

July 2020 to December 2020

- Collected field data at park sites and built and optimized SQL reports and queries that improved data retrieval and reporting efficiency.
- Used Power BI and Microsoft 365 (Excel, SharePoint) to display and analyze data and to collaborate, and worked with biologists, historians, and cultural resource specialists.

Operations Associate / Staff, Alcatraz Island

November 2015 to July 2020

- Part of the team that ran island operations and shaped the visitor experience, helping develop a premium, immersive visitor experience that increased island revenue from visitor programs and is still offered today.
- Managed multi-million-dollar contracts with third-party vendors, ensuring cost-effective solutions and high-quality island maintenance, and wrote standard operating procedures for safety protocols and the visitor experience.
- Led workflow improvements, including the move from Microsoft Office applications to Confluence, and served as the go-to resource for technology projects such as the internet provider and the landline to VoIP conversion.

ADDITIONAL INFORMATION

Certifications in progress: CompTIA A+, CompTIA Security+, and Microsoft Full-Stack Developer Professional Certificate.

Comfortable with hands-on, on-site work, including equipment setup and moving between locations. Professional references available upon request.
